

DFLWUP1 - NOTES AND COMPUTED VARIABLES
(Follow-Up Data between Exam 4 and Exam 5)

The file DFLWUP1 contains information from the basic follow-up contacts (90, 96, 102, 108, and 114 months) and the yearly follow-up contacts (96 and 108 months) between Exam 4 and Exam 5 exams. The file DFLWUP1 contains all of the information from the basic follow-up contacts and most of the information from the yearly follow-up contacts. Included in this file are the CARDIA hospitalization codes (refer to E1F31 documentation for code descriptions). The yearly follow-up text details concerning hospitalizations (including dates) are contained in a separate data set (DFLWUPT1). During the 108 month follow-up period, the Coordinating Center provided a form for the basic follow-up contacts; an example of this form is included in the documentation. The study-wide forms for the yearly follow-up contacts are also included.
