

D1F9TOBA - NOTES AND COMPUTED VARIABLES
(Tobacco Follow-Up Questionnaire)

New Release of Version 4.1

After D1F09TOB was distributed in September 1993, it was discovered that the cigarette brand name variable had been created incorrectly.

General Notes and Comments

The Tobacco Usage Follow-up form was completed for participants who answered 'yes' to any regular use of tobacco (past or present). The data include: follow-up questions 2.01 - 2.03 and 2.05 - 2.09 (cigarette cessation), 2.04 (brand-specific information), 3.01 (cigar), 4.01 (pipe) and 5.01 (smokeless tobacco). This file contains, at most, one (1) record per participant.

Brand-specific information is only obtained from current smokers and only one brand is allowed. Therefore, similar to Exam 3 but unlike Exam 1 and Exam 2, this file will not contain multiple records for a participant.

NOTE: The smoking status variable (D10SMOKE) is contained in the D1F10 file.
